

Frequentiel Hardware Services

We handle hardware complexity so you don't have to.

Track-and-trace, inventory, and mobility applications are hardware intensive, fast-evolving domains. Frequentiel can take care of all hardware and network complexity for you.

We maintain relationships with a broad range of manufacturers and can source, support, finance and also rent the right hardware for your specific needs.

Choice of **Best-in-Class Hardware**

We currently support over 2,000 sites in production and over 20,000 readers and terminals in use. Hardware we implement include:

- Mobile terminals (PDAs) and tablets.
- Scanning guns, alphanumeric devices.
- Mobile carts (stands, workstations).
- Portals.
- Mechanized tunnels (conveyor belt systems).
- Routers, access points, antennas.
- Overhead sensors.
- In-warehouse location systems.
- Retail rack, shelves.
- Palletized applications (on-wood applications).
- Shipping containers (active, all weather, on-metal applications).

We can also help you select the right consumables for your project (paper-based tag, plastic, hardened tag, etc.).

Turnkey Hardware Management

We offer fleet management, technical support and after-sales services.

- User training and change management.
- User provisioning, remote hardware configuration, and supervision.
- Remote and on-site support.
- Auditing and upgrade planning.

Flexible Financing Plans

Frequentiel also provides flexible purchase and leasing plans.

- Choice of specialist financial partners.
- Cost effective upgrade and part-exchange plans.
- Availability of both new and refurbished equipment.
- Transparent maintenance and repair costs.

Equipment Rental

We offer a wide range of equipment on a rental basis.

- Own what you need daily, rent what you need during peak activity periods.
- Test new material before purchasing.
- Short and long-term rental plans.
- Broad selection of RFID and barcode terminals.
